

HEALTHCARE ENVIRONMENTAL
GROUP LTD

Over 25,000 clients already trust
Healthcare Environmental Group to
manage their Services, **why don't you?**

Your **waste** management partner

Your **waste** management partner

Healthcare Environmental Services Group is the largest independent full facilities waste management solutions company in the UK. Specialising in clinical waste, hazardous waste, medical waste, sharps waste, solid waste and recycling solutions.

Customer Service is the crucial difference between Healthcare Environmental Group and its competitors. We can offer flexible, tailored waste management & recycling solutions, ranging from high-volume, multi-site waste producers like the NHS Trusts, Research and Development companies to high street chains. Our focus is on delivering the right solution and doing whatever it takes to ensure the correct legislation and best service is provided on time and to budget.

Our reliable drivers and friendly customer services staff provide Healthcare Environmental Groups consistently excellent service and responsiveness. Their experience and dedication are renowned in the waste management industry. Our team understands and supports our overall business strategy of long-term customer retention through excellent service, reasonable prices and long-term relationships.

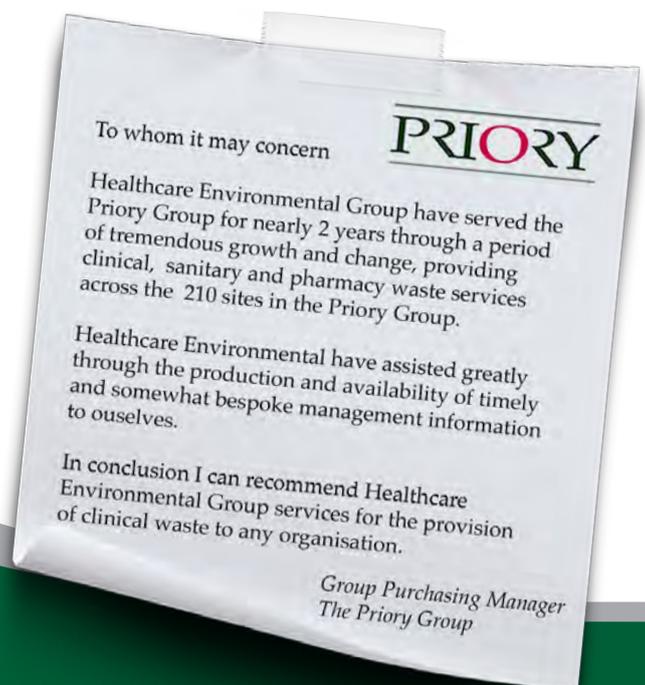

“
Our network is nationwide, so you're covered by our friendly local staff”

We will ensure that your materials are handled professionally while implementing the most sustainable solution possible

One Waste Solution is an integrated waste management organisation, which aims to provide its clients with a valuable and reliable total waste management service provision.

The business offers innovative and sustainable waste management strategies to various types of organisations concerned with environmental management and sustainability.

Within the service offering the business will provide solutions that will suit your needs and in strict accordance with legislative requirements.

Healthcare Sharps provides a fully compliant, low-cost system to avoid the use of single-use sharps containers

Predominantly over the years, large volumes of sharps containers have been destroyed after one single use. With the introduction of our containers the healthcare and research industry are about to change.

We have developed a totally re-usable system for all sectors within the healthcare industry, we have designed and developed a family of containers suitable for the UK market, ranging from 2ltr to 22ltr.

The NHS spends over £30 million pounds UK wide on disposable sharps containers, utilising our system could save the NHS in excess of £15 million pounds.

Healthcare Washroom is dedicated to keeping your washrooms clean and fresh

Our well-trained staff will ensure that all of your washrooms are maintained to the highest hygienic standards, while our range of female sanitary hygiene equipment is modern and stylish.

We care about our customers, and tailor our sanitary services to meet the needs of each of our clients individual business operations - from monitoring your service frequency, assessing your washroom requirements and agreeing timing of service visits. We understand sanitary services better than anyone in the UK, so we know the importance of fast response times when you need it most. Nothing is too much trouble for the Healthcare Washroom Team.

New Service

Cost effective energy and resource solutions

Our aim is to provide our clients with the right advice and services to reduce their consumption of energy and natural resources, allowing them to improve the sustainability of their operations whilst minimising costs. We work with clients to understand the key sustainability issues that they face, and apply our extensive knowledge of energy and resource management best practice to deliver tailored solutions.

We offer services in:

- **Cost effective energy and resource solutions**
- **Energy & Emissions**
- **Resource Efficiency & Compliance**
